PETRONAS Durance is a premium range of car grooming products, specially developed and manufactured by Arexons, a division of PETRONAS in Milan, Italy.

PETRONAS Durance car care products are supplied to the MERCEDES AMG PETRONAS Formula One Team to help protect and ensure the excellent visual presentation of the Silver Arrows.

Formula One is not only about performance and speed, it is also the quest for perfection, achieved through hard work and attention to detail. It is this success that inspired the development of PETRONAS Durance.

Go ahead, give your car a F1 inspired grooming experience.

CAR CARE: INTERIOR

UPHOLSTERY CLEANER

Cleans and restores fabrics to their original colours.

Upholstery Cleaner penetrates deeply to restore the original colours of all fabrics, cloths and velour surfaces in the car. This includes seats, carpets, door trim panels, mats and more. It breaks up and eliminates the most stubborn dirt on fabric (such as grease, coffee, lipstick, drinks, milk, etc.) with maximum efficiency. The product contains active substances that penetrate fibres, thereby neutralising unpleasant odours caused by smoke or animals.

COCKPIT CLEANER SHINE

Cleans cockpits and protects from aging.

Cockpit Cleaner Shine cleans, polishes and protects dashboards and any plastic, imitation leather, rubber, walnut or wooden surface in the car. Its exclusive neutralising formula cleans the treated surface thoroughly, cleansing it and removing dust and allergens held by the material, as well as eliminating the smell of smoke.

COCKPIT CLEANER MATT

Polishes cockpits and protects from aging.

Cockpit Cleaner Matt cleans and protects dashboards and is specifically formulated for new generation dashboards. It also cleans and protects any plastic, imitation leather, rubber, wooden and walnut surface in the car. Its exclusive neutralising formula cleans the treated surface thoroughly, cleansing it and removing dust and allergens held onto the cloth while eliminating the smell of smoke.

FINISHING

SCRATCH REMOVER

Removes scratches from the bodywork.

Scratch Remover removes superficial scratches, and makes deeper scratches less visible on all painted surfaces of cars, without damaging the bodywork.

FAST WAX

Polishes and protects in one step.

Fast Wax is a high-performance spray protection, formulated with Carnauba, offering a deeper and more intense reflection, with a gloss and shine like no other. It is the ideal product for those who need to wax their car quickly. It is as perfect a finish as after washing, and it does not whiten plastic.

WINDSCREEN CLEANER

SC 35

Windscreen wash concentrated SC 35.

Thanks to its unique formula, SC 35 is resistant to freezing temperatures as low as -35°C, and ensures the effective cleaning and degreasing of windshields, removing dirt such as grease, smog, dust, and traces of insects. It also leaves a pleasant lemon scent in the air which gently fills the passenger compartment. The product is concentrated, and doses must be diluted as per the label.

ADDITIVES: PETROL

FUEL INJECTOR CLEANER

Restores fuel system efficiency and cleans and removes deposits from injectors.

This product helps clean and remove deposits from the injectors. It assists in dissolving deposits and residue in the fuel system, and helps normalise irregular idle. The cleaner reduces exhaust gas emissions, and restores the original consumption and power. A single treatment can unblock clogged injectors, quickly dissolving deposits to maximise performance.

COMPLETE FUEL SYSTEM CLEANER

Cleans the entire fuel system, and protects the exhaust valves of modern high performance engines.

This product cleans and removes harmful deposits in the inlet valves, and helps protect the discharge valves of high performance engines. It also assists in preventing deposits from forming on the discharge valves, and it eliminates the irregular motion of the engine.

With us you are Number One

ADDITIVES: DIESEL

DIESEL INJECTORS CLEANER

Quickly cleans and removes deposits from injectors, and the whole common rail fuel system.

This product cleans and removes deposits from the injectors and the whole fuel system. It improves the lubricity of diesel fuel, and eliminates the irregular motion of the engine. It can help save up to 3,6% in fuel*. This product was designed for the latest generation of engines, especially the TDI, HDI, CDI, DCI and JDT engines.

*This percentage is subject to change, based on the weight of the car conditions, tyre pressure, driving style and route type (mainly in and outside of the city)

COMPLETE FUEL SYSTEM CLEANER

Cleans the entire fuel system and protects the discharge valves of modern high performance motors.

Regular use of this product extends an engine's life, while reducing consumption and maintenance costs. It ensures the correct lubrication of the fuel pump, reduces the corrosion caused by biodiesel, maintains the injector system cleanliness, and prevents deposits. It improves the combustion process, reduces noise and fume emissions, increases the centene number by up to 2 points, and makes it easier to start your car when it is cold. It is suited to the latest generation of engines, such as the TDI, HDI, DCL and JTD engines.

GLASS TREATMENT

GLASS CLEANER

This product is suitable for the thorough internal and external cleaning of all glass surfaces on a car. But that's not all - it is also ideal on glass surfaces in the home and garage, as well as for glazed and transparent plastic surfaces in scooters, cars, caravans and boats, etc. Furthermore, it cleans thoroughly without leaving smears.

EXTERIOR CLEANING

WASH & WAX

Cleans and polishes with self-drying action, and low foam formula.

Now the in-depth cleaning, waxing and drying of a car's bodywork can be done in just a few minutes. Its special formula cleans the treated parts, coats the surfaces with a very thin wax layer that enhances the effect of washing, and protects the bodywork against dust and rain. Its self-drying action prevents water droplets settling, making them drip off the bodywork.

TYRE RESTORER

Cleans and protects tyres, restoring them to their original colour.

This product is specially designed to polish, clean, revitalise and protect tyres, thereby restoring them to their original colour. Its special anti-aging formula makes tyres as flexible as new, and prevents hardening and cracking by the sun.

RESIN AND BUG REMOVER

This product is ideal for removing light and common resin deposits from the bodywork, as well as from all surfaces of a car (glass, metal and plastic parts, etc.). Its special gel formula transforms into an active foam, which ensures maximum results, even on vertical surfaces.

MULTIPURPOSE LUBRICANT

6 IN 1 SVITOL

Suitable for professional and DIY applications with 6 uses in 1 product.

1. Corrosion

It protects flat metal surfaces, mechanisms and gears, by inhibiting and slowing oxidation and corrosion processes, while maintaining efficiency and extending a car's life.

2. Water repellent

It protects surfaces from moisture and water by preventing the accumulation of salts and limestone deposits that could block mechanisms and slides. It protects electrical circuits, both inside and outside the car.

3. Detergent

It effectively cleans metallic surfaces by removing dust, dirt, rust, resins and adhesives. It cleans and polishes chrome surfaces. For safety, check the paint resistance on a non-visible area of the vehicle.

4. Reactivating

Restores electrical conductivity by eliminating current dispersion. It does not isolate contacts, nor does it bow or dissolve oxides, oils, greases, sludge, tar or combustion residues. Its dielectric characteristic returns contacts to their initial efficiency, protecting them during exercise.

5. Lubricant

It effectively and permanently lubricates all mechanisms by preventing degradation due to friction. In addition, it keeps motion fluid and efficient.

6. Unlocking

It quickly and effortlessly unlocks any locked mechanism or bolt, thanks to its penetrating power and exclusive additives - it penetrates deep into the blocked mechanisms.

AIR FRESHENER

AIRTECH CAR PERFUME

Eliminates unpleasant odours from cars while sanitising them.

This product is formulated to combat the smell of smoke and other odours, while simultaneously refreshing and purifying interiors. The perfume from the vents is filtered at high speeds to distribute the fragrance evenly and it is easy to adjust.
